PROFESSIONAL SUMMARY

Motivated Computer Science graduate (B.Tech 2025) specializing in **Java Full Stack Development**. Strong foundation in Core Java (OOP, Collections, Multithreading, Java 8+ Streams), Spring Boot 3, Spring Security (JWT), RESTful Web Services, and MySQL. Experienced in building responsive, production-ready front-end web applications using **React.js**, Tailwind CSS, Axios, and JavaScript (ES6+). Proven track record of architecting full-stack solutions with role-based security, interactive maps, payment integrations, and cloud deployment on **Vercel** and **Render**. Actively seeking an entry-level Java Developer / Software Engineer role.

TECHNICAL SKILLS

Programming Languages	Java (Core Java, OOP, Collections, Multithreading, Streams API), SQL, JavaScript (ES6+)
Frameworks & Backend	Spring Boot 3, Spring MVC, RESTful APIs, Spring Security (JWT), Spring Data JPA, Hibernate, JDBC
Frontend & Web	React.js, Tailwind CSS, HTML5, CSS3, Axios, React Router, Lucide Icons, Leaflet (GPS Maps)
Databases & Tools	MySQL, Postman, Git, GitHub, Maven, Swagger / OpenAPI, Docker
Cloud & Deployment	Vercel (Frontend CI/CD Deployment), Render (Spring Boot Docker Containerization)

FEATURED PROJECT

Mechanic Buddy — Full-Stack Automotive & Roadside Assistance Platform

[Live Demo](#) | [GitHub](#)

Tech: React.js, Tailwind CSS, Spring Boot 3.2, Spring Security, JWT, Spring Data JPA, MySQL, Axios, Leaflet GPS, Vercel, Render

- Architected a comprehensive full-stack digital platform connecting vehicle owners with mechanics across 3 distinct roles: **Admin**, **User**, and **Mechanic**.
- Implemented **Spring Security + JWT stateless authentication** enforcing role-based access control (RBAC), password hashing with BCrypt, and secure session management across all REST APIs.
- Engineered end-to-end service request lifecycle: vehicle owners submit breakdown requests, view mechanic profiles, and track repair status; mechanics review, accept, or reject requests and update service milestones in real time.
- Integrated real-time mechanic discovery by GPS geolocation and city filtering, interactive **Leaflet maps**, 24/7 breakdown request dispatching, and secure Razorpay payment processing.
- Developed an Admin Console featuring interactive **Recharts** data analytics, customer account management, mechanic partner verification, and contact inquiry logs.
- Designed normalized relational schemas in **MySQL** utilizing **Spring Data JPA and Hibernate** with transactional integrity (@Transactional), DTO request/response mapping, Bean Validation (@Valid), and centralized error handling (@ControllerAdvice).
- Deployed frontend to **Vercel** via continuous integration/continuous deployment (CI/CD) and containerized backend microservices to **Render** connected to a cloud MySQL database.

EDUCATION

B.Tech in Computer Science and Engineering — Sree Chaitanya Institute of Technological Sciences, Karimnagar	2021 – 2025 CGPA: 6.91
Intermediate (MPC) — SR Junior College, Hanamkonda	2019 – 2021 94.6%
Secondary School Certificate (SSC) — Tetrahedron High School, Huzurabad	2018 – 2019 GPA: 9.7

STRENGTHS & LANGUAGES

Technical Strengths: Full-stack web architecture, REST API design, Agile & SDLC, clean code standards, version control (Git).
Languages: English (Professional), Telugu (Native), Hindi (Conversational).
